Eugenia,

As discussed on the call attached is a section from our Final Report for Remedial Construction. The highlighted text includes information on how to repair the GCL, HDPE geomembrane, and the geocomposite drainage layer.

We will also look into the tiebacks to determine whether they are located within the sample area and let you know.

Thanks
Enrique

Eugenia,

We agree that a call is a good idea. Thursday, 7/9, works best for us.

Thanks
Enrique

Enrique/Paul

We have scheduled the sampling at the Givaudan cell for Thursday August 13 2015. We should have a call with you to discuss possible sampling dates at Lister Avenue and any logistic or sampling questions that Tierra may have. The last two weeks of August are not looking good to sample, given people's schedules and vacation. Lockheed and EPA are available for a call either Thursday 7/9 between 10-1, Monday 13 anytime or Tuesday 14 anytime, let me know if any of these work for your team.

Thanks,
eugenia

Hello Eugenia,
Any updates on the sampling dates? Are you still planning on next week?

Enrique

Paul/Enrique,

We are targeting July 6-7 to sample the Givaudan cell and we will try to sample at Lister Avenue a few dates after, hopefully within the same week. We should schedule a call to coordinate logistics once we can confirm sampling dates.
Thanks, Eugenia

Good afternoon Eugenia - can you tell us anything more on the schedule for the sampling and if it makes sense for us to get together to coordinate on the work at our site. Enrique (ccd) will be involved with this.

Thanks
